Bastion Research Ally - Bespoke Equity Research Services

Helping India's most discerning investors make sharper decisions.

At Bastion Research, we partner with family offices, institutional investors, fund managers, and HNIs to deliver high-conviction, custom equity research on Indian listed companies. Our process is grounded in rigorous business-first analysis, with each project culminating in clear, actionable insights.

Our service is designed for investors who value depth, clarity, and accountability in decision-making

Why Work With Bastion?

Not Pre-Packaged – Every project is built from scratch, mapped to your decision-making process

Sector-Agnostic, Analyst-Led – We are open to covering almost any business irrespective of its sector or market cap.

Built for Portfolios – We don't publish for headlines. We build conviction for portfolios.

Transparent Process – You see our workings, frameworks, and questions, not just the end result.

Clarity Before Action – We keep refining our work until you're confident in the call.

Our Research Process

We follow a structured, 6-step research process to ensure each idea is thoroughly vetted and tailored to your portfolio needs:

1. Idea Generation

Ideas can originate from either the client or Bastion Research. We are sector-agnostic and market cap-agnostic, allowing flexibility to explore both niche and mainstream opportunities across the Indian listed universe.

Our team of 10 analysts cover the full market breadth, with each analyst specialising in 2–3 core sectors.

2. Accept/Reject Evaluation

Once an idea is shortlisted, we conduct a rapid initial screen to identify accounting, structural, or business-model red flags. This early-stage filter ensures time is not wasted on businesses that don't merit deeper evaluation.

Turnaround Time: 4–6 working days

Output: A 2–3 page summary note + screening model with flags (if any) and rationale

3. Deep Dive

If the idea passes the screen, we commit to a comprehensive business deep dive. This includes:

- Understanding the business model and capital allocation philosophy
- Preparing a detailed financial model and valuation framework
- Conducting forensic accounting checks
- Peer benchmarking and promoter background research
- On-ground channel checks (when required)

Turnaround Time: 20–25 working days

Output: A PDF Business Understanding Note + Financial Model (Excel)

4. Client Interaction

We conduct a detailed walkthrough of our findings over a call. The goal is to clearly communicate our thesis, flag key risks, and answer your questions.

You speak directly with the analyst who covered the company, ensuring domain expertise is always on the table.

5. Follow-up Research

If you're not yet in a position to take a clear call post-discussion, we keep working. We resolve all open questions before closing the loop.

No limits on follow-up iterations. The research is complete only when you're ready to make an informed decision.

6. Maintenance Tracking (Optional)

If you've acted on an idea and want to stay updated, we offer ongoing maintenance research: quarterly earnings tracking, major business developments, and strategic updates, shared via WhatsApp and OneDrive.
